## ABOUT MYSELF

---

From being a complete newbie to the tech field when I graduated with a bachelor's degree in chemical engineering in 2022, I have come so far. From taking my first step in the web dev world by writing my first HTML tags to now integrating AI models into my apps and trying to solve the problems I see in my surroundings. Teaching everything yourself from scratch, without being guided by a formal conventional curriculum, has its own cons, and I have felt that deeply in my journey. Fixing bugs after bugs and watching tutorials at midnight wasn't only a fun ride. The reward I get after completing a task I gave myself is my fuel to learn and dig more.
